Why choose disposable over fabric curtains?

NO LAUNDRY REQUIREMENTS

Disposable curtains do not incur expensive laundry costs unlike traditional fabric curtains.

100% RECYCLABLE

Our disposable curtains are 100% recyclable, reducing the hospital's environmental impact.

CAN BE MADE IN ANY COLOUR OR PATTERN

We can manufacture disposable curtains in any colour or pattern of your choosing (subject to minimums).

PRE-ATTACHED FAST FITTING HOOKS

Disposable curtains can be changed within 1 minute thanks to pre-attached fast fitting hooks.

SMART, NEAT APPEARANCE

The uniform appearance of disposable curtains along with the integral tieback gives wards a smart, neat look.

Changeover of disposable curtains

Disposable privacy curtains are marked with an expiry date and should be disposed of in accordance with manufacturer's IFU (Instructions For Use) local procedure and the State waste management guidelines.

AREA	CHANGEOVER FREQUENCY
Very High Risk <ul style="list-style-type: none"> ✔ Outbreaks of infectious disease ✔ New and emerging pathogens 	Change when visibly soiled or torn. Change immediately on patient discharge.
High Risk <ul style="list-style-type: none"> ✔ Intensive Care (ICU) ✔ High Dependency Unit (HDU) ✔ Burns Unit, Renal Unit ✔ Operating Suites ✔ Emergency Departments ✔ Wards with patients requiring transmission-based precautions 	Annually Change annually or if they are visibly soiled or torn.
Significant Risk <ul style="list-style-type: none"> ✔ General Wards 	Annually Change annually or if they are visibly soiled or torn.
Low Risk <ul style="list-style-type: none"> ✔ Rehabilitation ✔ Long term care/ nursing homes ✔ Office-based practice ✔ Medical centre, radiography 	Annually Change annually or if they are visibly soiled or torn.

Table 1 - Recommended changeover of disposable curtains

Antiviral, Antifungal and Antibacterial Treatment

Medical curtains help prevent the transmission of hospital-acquired infections (HAIs) by rapidly killing a broad spectrum of pathogens.

Our curtains are coated with a solution of nanometer silver and quaternary ammonium silicon compounds acting as proven strong antiviral, antifungal and antibacterial agents. The coating works by trapping the pathogens, preventing them from multiplying and effectively killing them.

The antimicrobial effect will last until the end of the curtain's useful life (see table above).

We supply the highest standard of quality antimicrobial disposable curtains to Australian Public and Private health care facilities.

We are committed to consistently delivering the best customer experience and value to our customers.

For whole hospital or facility contracts, we offer technology value-added services not currently available or offered anywhere in Australia until now.

TALK TO US ABOUT:

- ✔ Easy Fit Curtain Installation and Maintenance Service
- ✔ EasyScan validation technology with QR codes, asset management & real-time reporting, stock control, PAR ordering
- ✔ Recycling service (reducing waste by 85%) – We can help you achieve Zero landfill.
- ✔ Inservice, accreditation and staff training
- ✔ Built-in technology kills 99.99% of pathogens
- ✔ Improve patient safety by maintaining your facility to the highest possible infection control standards while reducing waste produced from medical curtains by 85%!

COST EFFECTIVE

Antimicrobial Curtains have become the preferred option over traditional linen curtains in Australia because the cost to purchase, replace, launder, maintain and change out isn't as cost effective as disposable medical curtains.

EASYSKAN INFECTION CONTROL PROTOCOL & VALIDATION

- ✔ Accreditation
- ✔ Patient Safety
- ✔ Stock Control
- ✔ QR codes for easier validation
- ✔ Accuracy
- ✔ Automated email prompting for restocking and changeouts
- ✔ Compliance to infection control standards
- ✔ Real time reporting through our client portal
- ✔ Technical support available

VALUE ADDED SERVICES

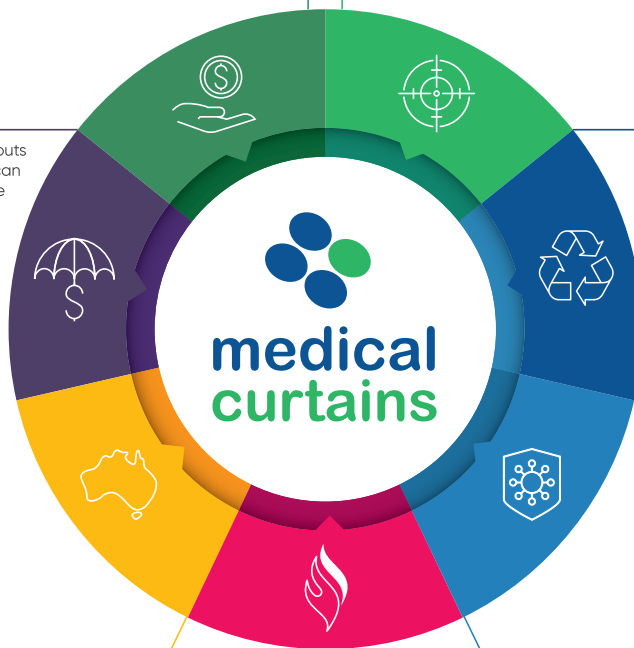

Preventative Maintenance Servicing and routine change outs are creating a circular economy. We have created EasyScan Infection Control protocol and validation to support whole hospital contracts. We can organise technicians to be available all over the country to support this service.

WE OFFER:

- ✔ **FREE** fitting service to all new customers *conditions apply*
- ✔ Preventative Maintenance Contracts where Medical Curtains will install and maintain your medical curtains twice a year.
- ✔ **FULLY** Managed Service Contracts. We will work with you to generate a schedule for the frequency of Medical Curtain changes.
- ✔ **CUSTOMISED** personalised designs available
- ✔ **BESPOKE** medical curtains can be made to the length or drop required
- ✔ **RECYCLING SERVICE** we can help with the collection for the purpose of CurtainMelt

MEDICAL CURTAINS IS AN AUSTRALIAN OWNED AND OPERATED COMPANY

We are a family business setting new standards in the Medical Curtain Industry by supporting a circular economy.

ZERO LANDFILL - 100% RECYCLABLE

Medical Curtains have partnered with 180 Waste to make ZERO Landfill possible. Curtains are made from polypropylene which means they can now be fully recycled with the CurtainMelt machine. The CurtainMelt reduces the volume of disposable curtains by up to 85%, using patented thermal technology to melt the curtains into solid 20kg blocks ready for the circular economy.

BUILT IN ANTIMICROBIAL TECHNOLOGY

Medical Curtains only source, supply and fit curtains that have been independently tested to kill 99.99% of bacteria increasing patient safety and protection against Hospital Acquired Infections (HAI's).

FIRE RETARDANT

Medical Curtains only source, supply and install curtains that are compliant with BS5867-2-2008 Type C.

EasyScan

Infection Control Validation Protocol

Having the ability to accurately validate your Disposable Medical Privacy Curtains when going through an accreditation may not be the easiest when recording it and documenting manually.

Most every facility producing reports involves handwriting the expiration date on the curtain label as well as manually updating the curtain records. Just imagine having to do this for a facility with over 1,000 curtains installed!

Add that to the numbers of daily changeouts and it quite literally becomes an impossible task. A 1,000-bed facility with a bi-annual exchange policy experiencing a 10% daily changeout rate typically exchanges an additional 4,500+ curtains each year!

For patient and staff safety it is important to monitor both periodic and spot changeouts and to understand how contaminated curtains, touched by everyone, can play a risk in the transmission of Healthcare Acquired Infections (HAI's).

EasyScan Validation and Infection Control Protocol Software has reporting and traceability that can give your facility peace of mind knowing that your curtains are operational, compliant and not a risk of compromising staff and patient safety.

REAL-TIME REPORTING

Infection Control Compliance Stock Control Alerts when there is a change in the compliance library and let the system show you what needs to be amended or reordered to meet compliance.

VALIDATION AND TRACEABILITY

Connecting Regulations which inturn creates Compliance Magic. Forget about scrolling through pages, creating Excel sheets or other outdated tools to solve compliance challenges.

USER FRIENDLY

Our compliance monitoring is intuitive. Everything is automatically logged, stored and communicated to ensure full traceability of compliance monitoring.

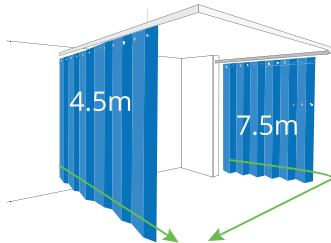

SOFTWARE BENEFITS

Let us show you how our EasyScan software allows you to quickly implement curtain exchange protocols, and always know your curtain status!
